

Contents of the BBBOX

- the basis
- 2 lids
- 2 drawers
- 2 large thin panels
- 2 small thin panels
- 1 plexiglass bottom
- 2 steel pins
- 2 straps
- 4 rubber bands

Instructions

- Remove the straps, without unclaspung the ends.
 - Remove the lids and empty the BBBOX.
 - Take out the plexiglass bottom from the BBBOX and give it a prominent place.
 - Take out the thin panels from the length of the BBBOX, remove the drawers and put the panels into the incisions of the drawers.
 - Put the rubber bands round the panels and round the lids. The knot should be at the grey side.
 - The lids will form the BBBOX's 'peaked roof'. This is most easily done by two persons.
- Place the lids on their short side on a table. One person holds the lids in place, while the other puts the straps round them and puts the steel pins into the holes to keep the lids apart at the bottom. The text 'bbbox bibliobox bbbox' should be on the big panel, the clasps should be at the bottom.
- This 'peaked roof' exactly fits the BBBOX.
- Now the panels can be used to display the booklets.
